

Celebration of Teachers and Teaching

faculty days at your school

Led by David Mallery, experienced seminar leader for programs for teachers, administrators, trustees and parents, and consultant to schools around the U.S. and to international schools in Europe and the Far East.

This will be a day of reflection, of celebration, honoring the profession of teaching and those who practice it. It will specifically be honoring teachers at this school. There is much to celebrate: the richness they bring to the school, the talent and spirit alive in your faculty and in the school's history they resolve, as individuals and as a school to make their professional and person journey soar and the school continue to develop, flourish and serve as they carry forth "the courage to teach."

In this celebration time, we will often be together as a total group and often in small, short conversations of two and three people, then coming together to share finds, then moving forward with different partners...on through a day of conversation, reflection, collegueship.

There will be no lecture of exhortations from "outside." The richness, the subject matter of the day will be the abundance of experiences, talents, shared visions alive and vibrant in the gathered faculty.
